GAM

CONSULTING & SERVICES

COMPANY PROFILE

MISSION

GAM CONSULTING & SERVICES was founded in **Cassino** in 2019 to provide engineering consultancy and services in the field of quality management and logistics, to companies operating in the following sectors:

AUTOMOTIVE
RAILWAY
AEROSPACE
FOOD & BEVERAGE
FASHION & LUXURY
DESIGN & FURNITURE

Engineering

We provide assistance to companies that intend to introduce improvements to their organization and management of their production processes, going to **increase product quality, reduce costs** caused by excessive scraps and share tools to operate in the logic of **continuous improvement.**

Consultant

We make our resources and skills available
to meet the needs of our Customers.
The main activities are:

- **Guided Growth (CSL3)**
- **SET (Third Party Surveillance)**
- **Process / Product Audit**
- **Temporary Management**
- **Capacity and Constraint Management**
- **Critical Supplier Management**
- **Supplier Monitoring**
- **Procurement and production planning**

Resident Engineer

We provide **daily support** to our Customers, linking them to their Customers Plants. With dedicated reports we can monitor and resolve, technical, quality and logistic problems.

Inspection and Containment

We offer **sorting and rework** activities. With qualified staff we are able to carry out visual and instrumental inspections, tracking activities in real time with various innovative technological systems.

CSL1 - CSL2 – GP12 | FAI Management | Vehicle/System Testing Vehicle inspection at dealers | Testing & Metrology

Logistic

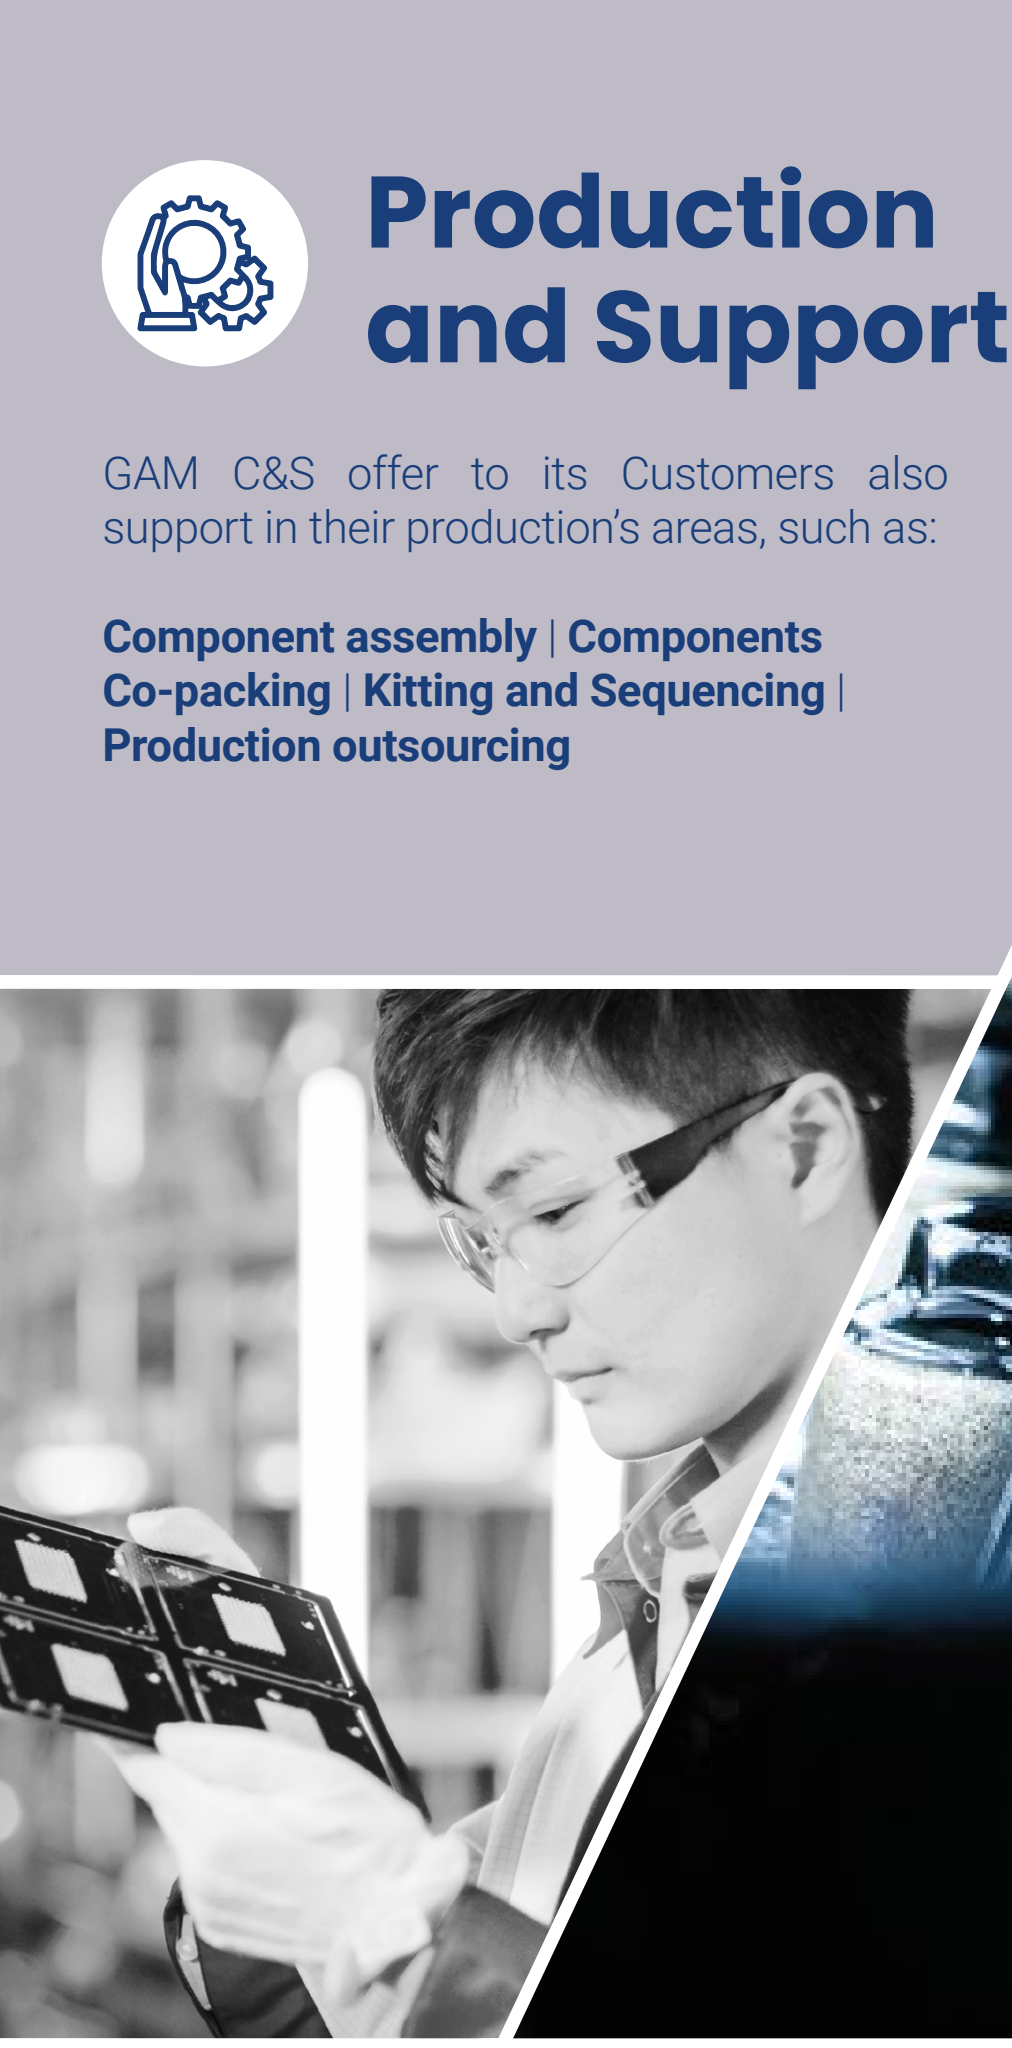

We are able to offer high value added services. We have several multi-client warehouses, located near the major OEM factories in Italy and abroad, equipped with the best security and surveillance systems. We take care of the management of the products shipped by our Customers, from the storage in advanced warehouses to the sequencing and transportation to the OEM Plants or intermediate warehouses (providing were required, kitting and/or co-packing). We are able to arrange sorting activities on potential NOK batches that are travelling from Customers plant or that could be withdrawn from the OEM plant. All the activities are tracked at each stage, and in some specific cases managed through JIS/JIT/KANBAN.

Production and Support

GAM C&S offer to its Customers also support in their production's areas, such as:

Component assembly | Components Co-packing | Kitting and Sequencing | Production outsourcing
